CONDITIONAL USE PERMIT APPLICATION

The undersigned owner, or owner's authorized agent, of property herein described hereby applies for a conditional use permit for the following described property:

1. Location of Property:

Street Address: 2975 Kapec Road Madison, WI 53744

Legal Description - (Metes & Bounds, or Lot No. And Plat):

Parcel Number - See Attached

***Also submit in electronic format (MS WORD or plain text) by email to: PLANNING@FITCHBURGWI.GOV

2. Current Use of Property: Non-Metallic Mining / Ready Mix Concrete Plant

3. Proposed Use of Property: Site for temporary Ready Mix Concrete Plant

4. Proposed Development Schedule: December 29th 2019 - December 29th 2021

5. Zoning District: Business

6. Future Land Use Plan Classification: Business

***Pursuant to Section 22-3(b) of the Fitchburg Zoning Ordinance, all Conditional Use Permits shall be consistent with the currently adopted City of Fitchburg Comprehensive Plan.

***Attach three (3) copies of a site plan which shows any proposed land divisions, plus vehicular access points and the location and size of all existing and proposed structures and parking areas. Two (2) of the three (3) copies shall be no larger than 11" x 17". Submit one (1) pdf document of the entire submittal to planning@fitchburgwi.gov.

Additional information may be requested.

Introductions & Intentions

Ready Mix Concrete

Ready mix concrete (RMC) is an essential building material for use in a variety of civil construction projects such as buildings, roads, bridges, and a variety of other structures. As the Wisconsin Department of Transportation (WisDOT) and a variety of other municipalities continue efforts to update and expand the Verona Road corridors in Dane County, the demand for a locally available and economical option for the production and distribution of RMC is critically important to on-time and on-budget projects to reduce the costs to tax payers and impacts on commuters for these projects.

Based upon the availability of some ingredient aggregate materials nearby as well as the proximity to the awarded construction work, the Wingra Stone site offers an ideal location for the staging of a portable, temporary RMC plant to be used on the Verona Rd project. The site is currently zoned as a quarry as well as a non-portable ready-mix concrete plant for Wingra Stone.

Trierweiler Construction is requesting this conditional use permit on behalf of Wingra Stone (Property Owner) to operate a temporary RMC plant beginning in December 29th 2019 to December 31st 2021 for projects awarded on the Verona Rd expansion project as well as associated WisDOT and municipal road construction projects.

Siting

The site, consisting of Parcel Pin 225/0609-063-9920-2 currently operates as a quarry/ ready mix concrete facility. The special exception permit area is approximately 200 ft by 200 ft in size, for the exact location and layout please see the attached map. No building or structure beyond the mechanical equipment is proposed as part of the application. The RMC batch plant will be temporary and portable in nature so as to be located adjacent to where the aggregate stockpiling is occurring.

Operation Description

The proposed temporary/portable installation of a RMC plant would be utilized to mix concrete and load trucks to the Verona Road corridor expansion and associated WisDOT and municipal projects. While the exact number of employee's varies between 3 and 15 on the RMC operations team. Access to the site will be via the existing driveways currently in use. Parking for the operators will be either adjacent to the plant, or utilize existing Wingra Stone employees parking lots located onsite. Operational periods will include generally day time operating hours (6:00AM – 8:00PM) during the week days and intermittent operation during the weekends only as project demands necessitate. However, WisDOT does sometimes require nighttime work to limit impacts to drivers and to improve worker and driver safety. As such, for some segments of the project this Conditional Use Permit application requests 24-hour operation to accommodate the WisDOT project schedule. It should be worth mentioning that nighttime operations will only be utilized when mandated in the plans and proposals by WisDOT. Outdoor storage would consist of piles of aggregates and sand stored within the existing site and similar to current material staging activities. Cement materials would be stored in portable enclosed bins and handled in such a manner to minimize any dust exposure. Activities conducted outdoors at the site, in addition to the existing quarry/ready mix concrete operations would include the staging, handling, and mixing of materials, loading of delivery trucks, and washout of trucks into internally drained ponds. Waste generated from washing activities would be handled by removal offsite to an appropriate

to an appropriate disposal facility. Domestic waste generation would be handled by an onsite dumpster that is regularly emptied by a local waste management service.

Zoning and Setbacks

The plant will be sited on the property to adhere to all setback's as set forth in the current City of Fitchburg and regulations that govern the property. See attached mapping for the proposed location within the property.

Erosion Control/ Storm Water Management

As part of participating in WisDOT construction work strict environmental and erosion control standards must be adhered to and are regularly monitored by WisDOT project staff. Trierweiler Construction also holds a current and valid plant specific WIDNR general permit for storm water runoff.

Noise

The noise emitted by the plants operations will be less than or equal to the current noise generated by the traffic on the highway.

Dust Control

Dust will be controlled through the use of enclosed bin for the storage of fine particle materials such as cement. Water is used extensively around the plant site during plant operations as needed to control the dust of the moving trucks. Water as well as sweeping is used on any adjacent roads that to control both dust and any debris that may track on to public roadways.

Lighting

If operations occur at night, outdoor lighting will be provided by portable lighting plants for the purpose of employee visibility and safety. The lights would be operated only during periods of night-time operation and as needed for visibility and safety. To mitigate impacts to neighboring residences and roadways, the lights will be directed away from property lines, neighboring parcels, and roads.

Closing Statement

Closing Statement

Trierweiler Construction (agent) on behalf of Wingra Stone (property owner) is submitting the enclosed Special Exception Permit for the proposed temporary ready-mix concrete batch plant along with the required fees and attachments. We are requesting approval for the operation from December 29th, 2019 to December 29th, 2021 in support of the Verona Rd corridor and municipal roadway construction projects. If you have any questions or concerns, or require additional information, or clarification, please feel free to contact me via the contact information listed on the front page.

Sincerely,

Nick Petit, Supervisor

Trierweiler Construction

Dane County Annual Operator Report

In Accordance with the Dane County Non-Metallic Mining Reclamation Ordinance

Reclamation Permit # 96

Township Fitchburg

Section # 7

Operator Wingra Stone

- Acreage currently affected by non-metallic mining extraction and not yet reclaimed since August 1, 2001: 20
- Amount of acreage that has been reclaimed to date, permanent or interim basis since August 1, 2001: 0

• Highlight these acreages on the plan map provided.

The purpose of this report is to adopt and implement effective reclamation requirements for non-metallic mining sites in Dane County and to provide uniform and predictable reclamation standards in accordance with Wis. Admin. Code Ch. NR 135 and Wis. Stats. Ch. 295, subchapter 1.

This report is not intended to interfere with zoning rules or regulations or with existing permits relating to the location, operation or end uses of an existing non-metallic mining site provided the permits otherwise comply with the provisions of this subchapter.

"I certify that this information is true and accurate, and that the non-metallic mining site described herein complies with all conditions of the applicable non-metallic mining reclamation permit and ch NR 135, WI Admin Code."

Introduction & Intentions

Ready Mix Concrete

Ready mix concrete (RMC) is an essential building material for use in a variety of civil construction projects such as buildings, roads, bridges, and a variety of other structures. As the Wisconsin Department of Transportation (WisDOT) and a variety of other municipalities continue efforts to update and expand the Verona Road corridor in Dane County and beyond, the demand for a locally available and economical option for the production and distribution of RMC is critically important to on-time and on-budget projects to reduce the costs to tax payers and impacts on commuters for these projects.

Based upon the availability of some ingredient aggregate materials nearby as well as the proximity to the awarded construction work, the Wingra Stone site on Kapec Rd offers an ideal location for the staging of a portable, temporary RMC plant to be used on the Verona Rd project. The site is currently operating as a quarry as well as a non-portable ready mix concrete plant for Wingra Stone. Trierweiler Construction is requesting this conditional use permit on behalf of Wingra Stone (Property Owner to operate a temporary RMC plant beginning in September 2017 to December 31st 2019 for projects awarded on the Verona Rd expansion project as well as associated WisDOT and municipal road construction projects.

Siting

The site, consisting of Parcel 225/0609-063-9920-2 currently operates as a quarry/ready mix concrete facility. The conditional use permit area is approximately 200 ft by 200 ft in size, for the exact location please see the attached mapping. The temporary concrete batch plant would be in the currently active portion of the quarry/ ready mix plant site. No building or structure beyond the mechanical equipment is proposed as part of the application. The RMC batch plant will be temporary and portable in nature so as to be located adjacent to where the aggregate stockpiling is occurring.

Operation Description

The proposed temporary/ portable installation of a RMC plant would be utilized to mix concrete and load trucks to the Verona Road corridor expansion and associated WisDOT and municipal projects. While the exact number of employees varies between 3 and 15 on the RMC operations team. Access to the site will be via the existing driveways currently in use. Parking for the operators will be either adjacent to the plant, or utilize existing Wingra Stone employee parking lots located onsite. Operational periods will include generally day time operating hours (6:00 AM – 8:00 PM) during week days and intermittent operation during weekends only as project demands necessitate. However, WisDOT does sometimes require nighttime work to limit impacts to drivers and to improve worker and driver safety. As such, for some segments of the project this Conditional Use Permit application requests 24-hour operation to accommodate the WisDOT Verona Road construction schedule. It should be worth mentioning that nighttime operation will only be utilized when mandated in the plans and proposals by WisDOT.

Outdoor storage would consist of piles of aggregates and sand stored within the existing site and similar to current material staging activities. Cement materials would be stored in portable enclosed bins and handled in such a manner to minimize any dust exposure. Activities conducted outdoors at the site, in addition to the existing quarry/ ready mix concrete operations would include the staging, handling, and mixing of materials, loading of delivery trucks, and washout of trucks into internally drained ponds. Waste generated from washing activities would be handled by removal offsite to an appropriate disposal facility. Domestic waste generation would be handled by an onsite dumpster that is regularly emptied by a local waste management service.

Zoning and Setbacks

The plant will be sited on the property to adhere to all setback's as set forth in the current City of Fitchburg zoning regulations that govern the property. See attached mapping for the proposed location within the property.

Erosion Control/ Storm Water Management

The proposed scope of work for the RMC plant installation is not expected to disturb additional land beyond the existing quarry activities. At present the entirety of the site drains internally and this determination has received a Department of Natural Resources concurrence which will be updated and maintained appropriately. Additionally, as part of participating in WisDOT construction work strict environmental and erosion control standards must be adhered to and are regularly monitored by WisDOT project staff. Trierweiler Construction also holds a current and valid plant specific WIDNR general permit for storm water runoff.

Lighting

If operations occur at night, outdoor lighting will be provided by portable lighting plants for the purpose of employee visibility and safety. The lights would be operated only during periods of night-time operation and as needed for visibility and safety. To mitigate impacts to neighboring residences and roadways, the lights will be directed away from property lines, neighboring parcels, and roads.

Closing Statement

Trierweiler Construction on behalf of Wingra Stone (property Owner) is submitting the enclosed Conditional Use Permit application for the proposed temporary ready mix concrete batch plant along with the required fees and attachments. We are requesting approval for the operation from Sept 19th, 2017 to December 31, 2019 in support of the Verona Rd corridor and municipal roadway construction projects. If you have any questions or concerns, or require additional information or clarification, please feel free to contact me via the contact information listed on the front page.

Sincerely,

Brooks Fechhelm, P.E.
